VOL. 546, NOS. 1+2 JOURNAL OF CHROMATOGRAPHY JUNE 21, 1991

CONTENTS

INTERNATIONAL ION CHROMATOGRAPHY SYMPOSIUM 1990, SAN DIEGO, CA, SEPTEMBER 30–OCTOBER 3, 1990

Foreword 1

INTRODUCTION

Twenty years of ion chromatography (Review)
by H. Small (Leland, MI, U.S.A.) 3

THEORY

Charged surface and mass transfer in dynamic ion exchangers
by R. Bailey and R. M. Cassidy (Saskatoon, Canada) 17

Peak interactions under concave isotherm conditions in preparative ion chromatography
by C. A. Lucy, T.-L. Luong and S. Elchuk (Chalk River, Canada) 27

Computer optimization in ion chromatography. II. A systematic evaluation of linear retention models for anions
by A. D. Sosimenko and P. R. Haddad (Kensington, Australia) 37

TECHNIQUES

Sample handling

Sample preparation for ion chromatography by solid-phase extraction
by I. K. Henderson, R. Saari-Nordhaus and J. M. Anderson, Jr. (Deerfield, IL, U.S.A.) . 61

Stationary phases

Application of macrocyclic ligands to ion chromatography (Review)
by J. D. Lamb and R. G. Smith (Provo, UT, U.S.A.) 73

Universal stationary phase for the separation of anions on suppressor-based and single-column ion chromatographic systems
by R. Saari-Nordhaus, I. K. Henderson and J. M. Anderson, Jr. (Deerfield, IL, U.S.A.) . 89

Anion–cation separations on a mixed-bed ion-exchange column with indirect photometric detection
by D. J. Pietrzyk, S. M. Senne and D. M. Brown (Iowa City, IA, U.S.A.) 101

Ion exclusion

Principles and applications of ion-exclusion chromatography (Review)
by J. S. Fritz (Ames, IA, U.S.A.) 111

The use of pulsed amperometry combined with ion-exclusion chromatography for the simultaneous analysis of ascorbic acid and sulfite
by H. P. Wagner and M. J. McGarrity (London, Canada) 119

Gradient and temperature programming

Comparison of gradient elution separations for organic and inorganic anions with chemically suppressed conductometric detection
by S. Harvey (Wadsworth, TX, U.S.A.) 125

Temperature programming in macrocycle-based ion chromatography
by R. G. Smith, P. A. Drake and J. D. Lamb (Provo, UT, U.S.A.) 139

Determination of analytes at extreme concentration ratios by gradient ion chromatography with solid-phase reaction detection
by D. T. Gjerde (Santa Clara, CA, U.S.A.), D. J. Cox (Waterloo, NY, U.S.A.) and P. Jandik and J. B. Li (Milford, MA, U.S.A.) 151

Electrodialytic eluent generation and suppression. Ultralow background conductance suppressed anion chromatography
by D. L. Strong, C. U. Joung and P. K. Dasgupta (Lubbock, TX, U.S.A.) 159

Detection

Detection in ion chromatography (Review)
by R. D. Rocklin (Sunnyvale, CA, U.S.A.) 175

Practical applications of solid-phase reagent conductivity detection in ion chromatography
by P. E. Jackson, P. Jandik, J. Li and J. Krol (Milford, MA, U.S.A.), G. Bondoux (St. Quentin en Yvelines, France) and D. T. Gjerde (Santa Clara, CA, U.S.A.) 189

APPLICATIONS

Anions

Separation of inorganic analyte anions on dye-coated stationary phases
by T. A. Walker (Kansas City, MO, U.S.A.) 199

Recent advances in the simultaneous determination of anions and silica in high-purity water
by S. Harvey (Wadsworth, TX, U.S.A.) 209

On-column matrix elimination of high levels of chloride and sulfate in non-suppressed ion chromatography
by Marheni, P. R. Haddad and A. R. McTaggart (Kensington, Australia) 221

Cations

Separation and detection of group I and II cations by ion chromatography
by D. L. Campbell, J. Stillian, S. Carson, R. Joyce and S. Heberling (Sunnyvale, CA, U.S.A.) 229

Progress in optimization of transition metal cation chromatography and its application to analysis of silicon wafer contamination
by K. A. Ruth and R. W. Shaw (St. Peters, MO, U.S.A.) 243

Cation analysis of fermentation broth by high-performance liquid chromatography utilizing ion interaction
by R. G. Bell (Chicago Heights, IL, U.S.A.) 251

Optimization of the procedure for the determination of alkali and alkaline-earth elements in sea water by suppressed ion chromatography
by M. Betti, G. Giovannoni, M. Onor and P. Papoff (Pisa, Italy) 259

Non-ionic compounds

Ion chromatographic methods for the detection of starch hydrolysis products in ruminal digesta
by K. Barsuhn and S. F. Kotarski (Kalamazoo, MI, U.S.A.) 273

Determination of xylose oligomers and monosaccharides by anion-exchange chromatography with pulsed amperometric detection
by S. Mou, Q. Sun and D. Lu (Beijing, China) 289

Determination of saccharides in biological materials by high-performance anion-exchange chromatography with pulsed amperometric detection
by D. A. Martens and W. T. Frankenberger, Jr. (Riverside, CA, U.S.A.) 297

Environmental

Determination of free nitrilotriacetic acid in environmental water samples by ion chromatography with potentiometric and amperometric detection with a copper electrode
by W. Buchberger, P. R. Haddad and P. W. Alexander (Kensington, Australia) 311

Environmental applications of ion chromatography in China
by S. Mou (Beijing, China) 317

Azide determination in protein samples by ion chromatography
by P. L. Annable and L. A. Sly (Kansas City, MO, U.S.A.) 325

Determination of dissolved hexavalent chromium in industrial wastewater effluents by ion chromatography and post-column derivatization with diphenylcarbazide
by E. J. Arar and J. D. Pfaff (Cincinnati, OH, U.S.A.) 335

Determination by ion chromatography and spectrophotometry of the effects of preservation on nitrite and nitrate
by M. Roman, R. Dovi, R. Yoder, F. Dias and B. Warden (Geneva, IL, U.S.A.) 341

Industrial

Application of ion chromatography to failure analysis of electronics packaging
by M. Plat and J. de Leo (Hopewell Junction, NY, U.S.A.) 347

Ion chromatography for the analysis of household consumer products
by D. Murawski (Princeton, NJ, U.S.A.) 351

Ion chromatography in the manufacture of multilayer circuit boards
by R. E. Smith (Kansas City, MO, U.S.A.) 369

Improved determination of alkanolamines by fluid chromatography with electrochemical detection
by D. L. Campbell and S. Carson (Sunnyvale, CA, U.S.A.) and D. van Bramer (Seattle, WA, U.S.A.) 381

Use of ion chromatography in agricultural research (Review)
by A. A. Hafez, S. S. Goyal and D. W. Rains (Davis, CA, U.S.A.) 387

Separation and detection of non-chromophoric, anionic surfactants
by J. B. Li and P. Jandik (Milford, MA, U.S.A.) 395

Determination of total nitrogen in food, environmental and other samples by ion chromatography after Kjeldahl digestion
by P. E. Jackson, J. Krol and A. L. Heckenberg (Milford, MA, U.S.A.) and M. Mientjes and W. Staal (Etten-Leur, The Netherlands) 405

CAPILLARY ELECTROPHORESIS

Optimization of inorganic capillary electrophoresis for the analysis of anionic solutes in real samples
by J. Romano, P. Jandik, W. R. Jones and P. E. Jackson (Milford, MA, U.S.A) 411

Determination of organic acids in food samples by capillary electrophoresis
by B. F. Kenney (Milford, MA, U.S.A.) 423

Optimization of detection sensitivity in the capillary electrophoresis of inorganic anions
by P. Jandik and W. R. Jones (Milford, MA, U.S.A.) 431

Controlled changes of selectivity in the separation of ions by capillary electrophoresis
by W. R. Jones and P. Jandik (Milford, MA, U.S.A.) 445

Analysis of anion constituents of urine by inorganic capillary electrophoresis
by B. J. Wildman, P. E. Jackson, W. R. Jones and P. G. Alden (Milford, MA, U.S.A.) . . 459
